## Summary

A flexible person who loves learning and solving problems. I pay attention to details and can handle complex situations while staying in tune. I work well in teams, manage time effectively, and stay calm under pressure. Let's work together to achieve great things.

---

## Skills

---

### Front-end:

- HTML, CSS(sass/scss) / JavaScript / TypeScript / ReactJS / Tailwind / Bootstrap / ReduxTK / Styled Components / React Native

### Back-end:

- NodeJS / ExpressJS / NextJS / Prisma / PostgreSQL

### APIs:

- REST APIs / useQuery / Fetch / Axios

### Cloud Computing:

- Docker / AWS

### Version control:

- Git / GitHub

## Experience

---

### Hiotlabs AB - Software Engineer (Stockholm) / 2023 - 2023 (5m)

As a software engineer at Hiotlabs, I played one of the key roles in a dynamic team focused on innovative property damage prevention solutions. Leveraging React, Next.js, React Native and Node.js, I contributed to cutting-edge products that redefined user expectations. Collaborating closely with UI/UX

designers, I merged technical expertise with design, creating powerful and visually appealing solutions.

In backend development, I worked with scalable server components, handling APIs, data, security, and performance. My work not only pushed technological boundaries but also aligned with Hiotlabs' mission, delivering impactful solutions that made a real difference.

**Tech stack:**

Javascript, ReactJS, MobX, NextJS, useQuery(tanstack), TypeScript, Axios, Tailwind, Module.(s)css, Docker, Github, Postman, CI/CD pipeline, Figma UI/UX design

**Swedcon18 AB - Front-end Developer (Stockholm) / 2021 - 2022**

Engaged in a project that aims to provide affordable medical advice from certified professionals to low-income individuals, I collaborate closely across design and back-end teams. This involvement provides insights into the Java-Spring Boot infrastructure.

With React, NextJS I constructed a high-performing "Carelyo" platform for online consultations for patients and doctors for quick consultation in conditions of unstable connection and low Internet speed. My contributions extend to mentoring junior developers and enhancing the project's collective proficiency. Furthermore, I diligently compiled documentation, shedding light on our technological landscape and system architecture.

**Tech stack:**

Javascript, ReactJS, NextJS, useQuery(tanstack), TypeScript, Axios, Tailwind, Module.(s)css, Docker, Github, Postman, CI/CD pipeline, Figma UI/UX design

**Spacept AB - Junior Front-end Developer (Stockholm) / 2021 - 2021**

I joined a rapidly growing startup, Spacept AB, for a 6-month project. Within this company, I collaborated with a creative and energetic team. During this period, I learned new techniques, including Amazon Web Services tools like Amplify, Route 53, and Simple Storage Services (S3), and gained experience with WordPress and FileZilla.

My main task involved creating a calculator using the React.js library to compare different types of inspections. I also worked on geolocation for automatically recognizing Euro and Dollar zones for different clients.

**Tech stack:**

Javascript, ReactJS, Axios, Module.(s)css, Docker, Github, Postman, CI/CD pipeline, NextJS, Figma
